Safe Kids Benton-Franklin Coalition

Mission Statement:

The mission of the Safe Kids Benton-Franklin Coalition is to reduce the number of unintentional, preventable childhood injuries and resulting deaths that occur in Benton and Franklin Counties.

Our goal is to achieve this by uniting diverse groups and individuals; developing and implementing educational programs; initiating public policy changes; and increasing awareness within local and regional communities of the problem of childhood injuries.

Focus areas:

The Safe Kids Benton-Franklin Coalition has selected four primary prevention focus areas. These are *child passenger safety, head injury prevention, fire safety and drowning prevention.*

We also address *home safety, pedestrian safety, poison prevention, safe gun storage, safety in the home and other areas related to childhood safety.*

Meeting information:

The Safe Kids Benton-Franklin Coalition meets on the third Wednesday of every month at 12:00 - 1:30 p.m. at the United Way building at 401 N. Young, Kennewick.

“Tool Kits”**

Injury Prevention Tool Kits

Safe Kids Benton-Franklin has developed injury prevention “Tool Kits” for organizations to borrow.

Our goal is to make it easy for you to provide information to families or children on a variety of topics. You don't have to be a safety expert to educate on prevention. We need to work together to get safety messages out to families in our community!

The “Tool Kits” are designed to be a “presentation in a box”. They can be displayed at health fairs, safety meetings, family nights, Cub Scout meetings...wherever children and/or parents might gather.

- Most information is available in both English and Spanish.
- You can check out more than one topic area at a time.
- The “Tool Kits” can be reserved in advance for events.
